

DANIEL SHASHANK DESHMUKH

COMPUTER SCIENCE UNDERGRAD | AI & AUTOMATION ENTHUSIAST

855-208-4251 | deshmukhdaniel2005@gmail.com | Mumbai, India |
<https://github.com/DanielDeshmukh/> | <https://www.linkedin.com/in/daniel-deshmukh-7b08602b2/>

CAREER OBJECTIVE

- Computer Science graduate with a strong interest in building practical, real-world software systems. Experienced in developing client-based applications and handling end-to-end project delivery, including requirements, implementation, and iteration.
- Passionate about **automation and applied AI**, with a focus on learning, collaboration, and creating reliable solutions that improve everyday operations. Seeking an opportunity to grow within a structured team environment while contributing hands-on technical skills and adaptability.
- **Former Customer Service Associate at Reliance Retail**, where I learned to **stay composed under pressure** and handle clients gracefully.
- Currently developing **AI-powered platforms** such as *Aether* and *Babuji Chaay*, blending automation, design thinking, and real-world application.

WORK EXPERIENCE

Customer Service Associate,

SAHAKARI BHANDAR (RELIANCE RETAIL)

May 2024 – December 2024

- Delivered excellent **client service** and managed billing, inquiries, and transactions with accuracy.
- **Thrived in high-pressure environments**, maintaining calmness and professionalism during peak hours.

PROJECTS

Personal Portfolio: Daniel Shashank Deshmukh

<https://github.com/DanielDeshmukh/Portfolio>

- A professional, full-stack **digital identity platform** designed to showcase **scalable SaaS** systems and automation expertise.
- Implemented a sleek, professional UI with **TailwindCSS**, following a minimalist and high-contrast design aesthetic.
- Features centralized sections for **project galleries**, technical **skill visualization**, and direct contact integration via email and WhatsApp.
- **Status:** Production-ready and **deployed**.

- Live: <https://danieldeshmukh.netlify.app/>

TradeX: AI-Guided Trading Platform for Beginners

<https://github.com/DanielDeshmukh/TradeX>

- **AI-powered SaaS trading platform** designed to simplify investing for beginners through guided automation.
- Developed using **ReactJS**, **Node.js**, and **TailwindCSS**, integrated with **Dhan APIs** for brokerage operations.
- Implemented **Reinforcement Learning (PPO)** model to generate educational buy/sell/hold trade signals.
- Added tiered subscription plans and real-time WebSocket data feeds.

Status: Development Halt (core architecture completed)

Babuji Chaay: POS & Sales Management System

<https://github.com/DanielDeshmukh/Babuji-Chaay>

- **Client-based project** developed for **Mr. Vikas Yadav**, owner of *Babuji Chaay Café* located at **Mira Road (East), Kanakia Road – K.D Empire**.
- Designed and deployed a **Point-of-Sale system** tailored to café operations.
- Implemented modules for **billing, order tracking, inventory control, client requests, and authentication**.
- Built using **ReactJS**, **Supabase**, and **Express.js** with emphasis on performance, reliability, and user-friendly interface.
- An end-to-end solution that **streamlined daily café operations and improved order-to-bill turnaround efficiency**.
- **Status: Deployed**
- Live: <https://babujichaay.com>

AETHER: Automated Ethical Testing & Heuristic Evaluation Routine

<https://github.com/DanielDeshmukh/aether>

- AI-driven agentic security platform designed to move beyond static scanning toward intelligent, adaptive penetration testing.
- Developed a modular SaaS architecture using **React.js** for the frontend and **FastAPI** with **Playwright** for the execution layer.
- Implemented an **Agentic Reasoning Loop** using **LangGraph** and **Python** to simulate the decision-making process of a human security expert.
- Integrated **Gemini 1.5 Pro** and **Claude 3.5** for intelligent payload generation and context-aware response interpretation.
- Features a multi-tenant backend powered by **Supabase** with a built-in "Kill Switch" mechanism for target system safety.
- **Status:** In development (Core engine and backend services completed).

Premium Luxury Interior Design Portfolio

<https://github.com/DanielDeshmukh/Interior-Designs-Template>

- Premium **luxury interior design portfolio** developed as a client-facing demo to showcase high-end branding and conversion-focused web design.
- Built with **React 19**, **Vite**, and **Tailwind CSS**, featuring a custom luxury dark-mode theme with gold accents.
- Designed a **centralized configuration** system enabling rapid updates to services, projects, and contact details.
- Integrated **WhatsApp API** and **automated email** inquiry workflows to streamline client communication. Designed to **improve lead generation** and **client conversion**.
- Implemented dynamic project filtering, testimonial sliders, and optimized media handling using **Swiper** for performance.
- Deployed live with focus on **SEO**, **responsiveness**, and **real-world** usability.
- Status: **Production-ready** demo delivered for client evaluation
- Live: **<https://danieldeshmukh-webdesigns.netlify.app/>**

Qure: Voice receptionist system for hospitals and clinics.

<https://github.com/DanielDeshmukh/Qure>

- AI-powered **voice receptionist** system designed for hospitals and clinics to automate patient communication and front-desk operations.
- Built with an intelligent backend integrating telephony systems, voice processing, and **database driven appointment management**.
- Engineered to handle incoming calls, interpret patient requests, and autonomously book and **manage appointments**.
- **Implemented real-time queue** management with automated patient notifications for upcoming turns and scheduling updates.
- Purpose-driven solution focused on **reducing receptionist workload**, minimizing missed calls, and **enhancing overall patient experience**.
- **Status:** Actively under development. Frontend and database completed; backend and core AI systems in progress.

Ella: Retrieval & Reasoning Engine for Qure.

<https://github.com/DanielDeshmukh/ella>

- Agentic AI core engine powering **Qure**, designed to process natural language transcripts and act as an intelligent bridge between patients and **healthcare systems**.
- Built with a modular architecture combining intent classification, hybrid Medical RAG (**semantic + keyword retrieval**), and state-driven triage logic.
- Engineered an **intent dispatcher** using structured schemas to accurately route patient interactions across triage, booking, query, and **emergency** pathways.
- Implemented critical safety **guardrails** with **regex** and LLM-based detection for life-threatening symptoms, enabling immediate emergency response bypass.
- **Status:** Completed CLI with core **engine, routing, and safety systems**.

Hector: Hierarchical Evaluation of Civil-Criminal Textual's Orchestrator & Retrieval

<https://github.com/DanielDeshmukh/Hector>

- Agentic AI core engine powering HECTOR, designed as a high-precision **Hard-RAG** system for navigating complex Indian legal texts with zero-hallucination guarantees.
- Built with a modular Chain-of-Verification (CoVe) architecture combining intent routing, hybrid legal retrieval (**semantic + keyword search**), hierarchical contextualization, and strict citation validation.
- Specialized in mapping transitions from **IPC to BNS**, delivering precise, source-backed legal references with page and paragraph-level traceability.
- Integrated a **Validator Agent** enforcing strict citation grounding, ensuring responses are generated only when supported by verified sources from **curated Bare Acts** and **legal commentaries**.
- Status: Conceptualized and architected as a zero-hallucination legal intelligence system with verified retrieval and citation framework.

EDUCATION

Bachelor of Computer Science | Shree L.R. Tiwari Degree College, Mira Road (E)

Expected Graduation: 2026 (3rd Year)

Semester I 7.85 cgpa

Semester II 7.35 cgpa

Semester III 6.55 cgpa

Semester IV 7.50 cgpa

Semester V 7.55 cgpa

Academic Performance: Consistent 7+ CGPA in core semesters

Status: Final results expected **May 2026**

Higher Secondary Certificate (HSC) | Divine Providence jr. college of commerce & Science, Nallasopara (E) **Completion Year:** 2023

HSC: 54.80%

Secondary School Certificate (SSC) | Little Flower English High School, Nallasopara (W)

Completion Year: 2021

SSC: 58.40%

SKILLS

- **Languages & Core:** Typescript, Python, JavaScript (ES6+), HTML5, CSS3
- **Libraries & Frameworks:** React.js, Node.js, TailwindCSS, Express
- **AI & Automation:** GitHub Copilot & Codex, LangGraph, RAG Frameworks, Agentic Reasoning Loops.
- **Development Environments:** VS Code, WebStorm, Antigravity.
- **Tools & Architecture:** Git & GitHub, WebSockets, REST APIs, Figma, Httpie, Postman
- **Professional Strengths:** Leadership, Time Management, Adaptability
