

DANIEL SHASHANK DESHMUKH

855-208-4251 | deshmukhdaniel2005@gmail.com | Mumbai, India | github.com/DanielDeshmukh | [LinkedIn](#)

Career Objective

- Computer Science undergraduate (2026) with hands-on experience in end-to-end client project delivery, full-stack development, and applied AI systems: deployed production applications and agentic AI platforms built with LangGraph, RAG frameworks, and modern web technologies.
- Passionate about automation and real-world software solutions, with demonstrated ability to work under pressure and collaborate effectively; seeking a structured team environment to contribute technical skills in full-stack development and AI-driven product building.

Work Experience

Babuji Chaay Café

Freelance Full-Stack Developer

Jul 2025 – Mar 2026

Mira Road (E), Mumbai

- Designed and deployed a production-grade Point-of-Sale and Sales Management System for a live café business, Owned end-to-end delivery from requirements gathering to deployment.
- Built a full-stack solution using ReactJS, Supabase, and Express.js, featuring modules for billing, order tracking, inventory control, and role-based authentication.
- Delivered two client-specific features: a custom offer creation system and a Lucky Customer engine — owner sets a daily target number (e.g. 21), and the 21st customer automatically receives a 100% discount, fully automated with zero manual intervention.
- System actively live at babujichaay.com serving real customers daily.

Sahakari Bhandar (Reliance Retail)

Customer Service Associate

May 2024 – Dec 2024

Mumbai, India

- Managed high-volume billing and transaction processing with accuracy across peak retail hours, handling customer inquiries and resolving discrepancies in real time.
- Maintained accuracy and professionalism across 100+ daily customer interactions during peak-hour surges.

Projects

AETHER: Automated Ethical Testing & Heuristic Evaluation Routine | React.js, FastAPI, LangGraph, Python

<https://github.com/DanielDeshmukh/aether>

In Development

- AI-driven agentic security platform designed to move beyond static scanning toward intelligent, adaptive penetration testing; developed a modular SaaS architecture using React.js for the frontend and FastAPI with Playwright for the execution layer.
- Implemented an Agentic Reasoning Loop using LangGraph and Python to simulate human security expert decision-making; integrated Gemini 1.5 Pro and Claude 3.5 for payload generation, with a multi-tenant Supabase backend and built-in Kill Switch for target safety.

Ella: Retrieval & Reasoning Engine for Qure | LangGraph, Python, Medical RAG Deployed (CLI)

<https://github.com/DanielDeshmukh/ella>

- Built and deployed a CLI-based agentic AI engine featuring hybrid Medical RAG (semantic + keyword retrieval), intent classification, and state-driven triage logic to intelligently route patient interactions across booking, query, and emergency pathways — achieving ~1.8s average end-to-end response time.
- Implemented LLM-based and regex safety guardrails for real-time detection of life-threatening symptoms, triggering immediate emergency response bypass, routing critical cases outside the standard queue.

Hector: Legal Intelligence RAG System (Hard-RAG) | Python, CoVe, Hybrid RAG In Development

<https://github.com/DanielDeshmukh/Hector>

- Designing a high-precision agentic AI system for navigating complex Indian legal texts (IPC → BNS transitions), built on a Chain-of-Verification (CoVe) architecture combining hybrid retrieval (semantic + keyword), hierarchical contextualization, and strict citation validation.
- Engineered a Validator Agent that enforces zero-hallucination guarantees — responses are generated only when grounded in verified sources from curated Bare Acts and legal commentaries, with page and paragraph-level traceability.

Luxury Interior Design Portfolio | React 19, Vite, TailwindCSS

Client Demo — Deployed

<https://danieldeshmukh-webdesigns.netlify.app/>

- Built a production-ready client-facing portfolio featuring luxury branding, dynamic project filtering, and Swiper-powered media handling; deployed with SEO optimization and full mobile responsiveness.
- Integrated WhatsApp API and automated email inquiry workflows to streamline lead generation and client communication.

Personal Portfolio | *React.js, TailwindCSS*

Deployed

<https://danieldeshmukh.netlify.app/>

- Full-stack digital identity platform showcasing scalable SaaS systems and automation expertise; features project galleries, skill visualization, and direct contact integration via email and WhatsApp.

Education

Shree L.R. Tiwari Degree College, Mumbai University Expected May 2026

Bachelor of Computer Science CGPA: 7.5 (Current) | 7+ maintained across 5 of 6 semesters

Divine Providence College of Commerce & Science, Nallasopara (E) 2023

Higher Secondary Certificate (HSC)

Little Flower English High School, Nallasopara (W) 2021

Secondary School Certificate (SSC)

Technical Skills

Languages & Core: Python, TypeScript, JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: React.js, Node.js, Express.js, TailwindCSS, FastAPI

AI & ML: LangGraph, RAG (Semantic + Keyword), Agentic Reasoning, Chain-of-Verification (CoVe), LLM API Integration (Gemini, Claude)

Backend & Infrastructure: Supabase, WebSockets, REST APIs, Multi-tenant Architecture

Tools: Git & GitHub, Postman, Figma, VS Code, WebStorm

Soft Skills: Leadership, Adaptability, Client Communication, Delivery Under Pressure
